Exhaust smoke R34.03. Engine oil service intervals: 500 hours. Fuel start glow plugs.

CONTROLS

Loader and Transmission:

Hydraulic over hydraulic services reduce lever efforts to a minimum. Twin ergonomic joystick controls mounted on the seat are well positioned for easy use. Optional: rear control pattern. Joystick mounted auxiliary control push buttons for straightforward control of attachments.

Excavator:

Standard ISO Plus pattern control is logical as well as easy to learn and operate. Optional: JCB Plus or original controls.

LIGHTING AND ELECTRICS

12 volt diesel electric starting with 50 amp alternator and standard the modular start aid.

- Heavy duty services with secured sealed connectors for protection against water and dust ingress. The connectors conform to IP67 (DIN 40 050) standards. A woven nylon outer covering protects the harness against abrasion and also improves its resistance to water penetration.

- Standard battery 95Ah hour low maintenance.

Ignition, working lights, park brake and delayed auxiliary control switches mounted in right hand control panel.

Also incorporated in the side panel are the hourmeter and warning light cluster which includes a warning buzzer to draw operator's attention to any malfunction.

Located in the side panel is a well protected fuse box designed to keep dirt and grime out.

Key-box is positioned inside the cab/cockpit.

Rear lighting is available as an option as is a reverse alarm.

Working lights are fitted as standard.

TRANSMISSION

Full servo controlled hydrostatic transmission giving zero to maximum speed, both forward and reverse, at full power.

Independent transmission systems for both the left and right sides, controlled through servo lever, can shift for precise and easy operation.

Travel speeds 0 – 11km/h forward and reverse.

OPERATOR ENVIRONMENT

Full ROPS/FOPS canopy with soundproofing.

- Fully adjustable seat.
- Seat belt fitted as standard.
- Exceptional all-round visibility.
- Optional front screen.
- Fully glazed cab option.
- Low canopy option.
- Ergonomically designed controls.

BRAKES

The JCB hydrostatic transmission control provides the primary braking service. For parking, the JCB fail safe braking system features oil-immersed, multi-disc brakes for long life and fade-free braking. Operation is spring-on, hydraulic pressure off, activated through electrical parking brake switch.

TYRES

Standard 7 x 15 NHS 6PR
Optional 10 x 6.5 NHS 6PR

The standard flotation tyres are fitted for most applications. For adverse conditions JCB Airboss tyres are recommended. Grassland tyres are available for applications where ground disturbance needs to be minimized.

HYDRAULICS

In addition to the main hydrostatic drive pumps, there is a dedicated loader, backhoe and attachments supply pump. Both the main transmission and the loader controls are servo operated, for ease of use and precise control.

- Low lever efforts give excellent and easy control of transmission, loader, backhoe and attachments.
- Loader: joystick incorporates rocker switch control of attachments.
- Full flow, spin-on type hydraulic oil filter.
- Engine oil throughput for ease of servicing.
- Optional harrow prepwork.
- The optional hi-flow circuit provides 100 litres/min pump flow to the front of the machine for operation of high capacity attachments such as cold planers and trenchers.
- Auxiliary hand tool circuit.
